

YAKSHA HEALTH APP WITH TYPESCRIPT AND PLAYWRIGHT PL2-5

Mymedic automation using playwright

Usecase summary

Project Name:opensource-demo.orangehrmlive.com app – HR management system.

Use Case Summary: opensource-demo.orangehrmlive.com is designed to manage Employee record. Records (HRMS). It allows users to view, search, and manage employee records. It features functionality such as adding/editing employee details, filtering data by department and role, and exporting records. The primary use case is to automate the process of employee data management, ensuring efficient and reliable operations for human resources teams in organizations

Technology Stack:

- **Automation Tool:** Playwright (for testing)

Key Features:

- **Patient Record Management:** Add, edit, and delete Employee records.
- **Filtering and Search:** Search Employee records by date range, name, department, and more.
- **Export Functionality:** Export records for offline access.

Expected Outcomes:

- Automate key HR operations like employee record handling, filtering, and validation.
- Ensure the accurate retrieval and modification of employee records, enhancing operational efficiency.

Overview of the application

Pages/Features that are to be focused for the application

Please use the Application URL <https://yakshahrm.makemylabs.in/orangehrm-5.7>

PROBLEM STATEMENT

Need to automate the following activities using playwright+typescript

You will be given few Json files in Data folder like Login.json and TestData.Json

Path	File	Description
src\data	login.json TestData.json	1. Contains data to read from json file.

HRMS automation using playwright

src\ pages	<ul style="list-style-type: none"> • AdminPage • LeavePage • LoginPage • PIMPage • RecruitmentPage 	<ol style="list-style-type: none"> 1. All core activities are to be performed here. 2. The comments associated with each templated method here describe the expectation. 3. Declare any variable/object you need to share data/status between different methods. 4. Do not modify the signature of methods declared here.
------------	---	---

Here's a detailed table format for the test cases to be tested

Test Case No.	Test Case Name	Test Steps to be performed	Path & Method Used	Expected Result
1	Verify new User can be created	<ol style="list-style-type: none"> 1. Login to url with valid credentials 2. Click on "Admin" subtab 3. Click on "Add" button 4. fill the form & hit save button <p>It must implement this login functionality at first and then implement any other test case.</p>	<p>Reference path</p> <p>\src\pages\AdminPage</p> <p>methods</p> <p>AdminAdd()</p> <p>You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.</p>	new user should be added to the list
2	Verify new User can be created in previous step can perform the login with valid credentials	<ol style="list-style-type: none"> 1. Create a user in admin tab 2. logout 3. Verify new user created could login successfully 	<p>Reference path</p> <p>\src\ pages\AdminPage</p> <p>methods</p> <p>verifyNewUser()</p> <p>You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.</p>	New user should be able to login
3	Verify non admin user doesn't have access to 'admin' tab	<ol style="list-style-type: none"> 1. Create a user(ESS) in admin tab(Non admin) 2. logout 3. login using New user created 4. verify admin tab is not present in the sidebar 	<p>Reference path</p> <p>\src\ pages\Adminpage</p> <p>Methods:-</p> <p>verifyESS()</p>	Admin tab should not be present in the sidebar

HRMS automation using playwright

			You can use highlightElement method present in	
4	Verify the non admin user could be upgraded to admin	<ol style="list-style-type: none"> 1. Create a user (ESS) in admin tab (Non admin) 2. Click on "pencil" icon 3. Change user role from dropdown 4. set it to admin,click save button 	Reference path \src\ pages\Admin Methods:- upgradeAdmin() You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.	Verify the user get upgraded to admin in the list
5	Verify the delete selected functionality	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "Admin" subtab 3. Add new jobs to the list 4. Click on 'select all' button 5. Click 'delete selected' button 6. click 'yes delete' button 	Reference path \src\ pages\AdminPage methods deleteJob() You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.	All the jobs should get deleted from the list
6	Verify error appears when Notes size increase 255 character	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "Admin" subtab 3. Click on 'organization' subtab 4. Toggle on 'edit' switch 5. Enter string over 255 characters in notes 	Reference path \src\pages\AdminPage methods: inputLimit()	Error message stating 'Should not exceed 255 characters' should be displayed
7	Verify the sample csv file get downloaded successfully	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "PIM" subtab 3. Select 'Data Import' option from Configuration dropdown 4. Click on 'Download' link 	Reference path \PageObjects\Pages\PIMPage methods: downldCsv()	Sample csv should get downloaded

8	Verify the selected count is displayed correctly	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "PIM" subtab 3. Select 'Termination Reason' option from Configuration dropdown 4. Select first 3 reason from the list 5. Verify the count is displayed as 3 	Reference path \src\pages\PIMPage Methods: countTermination()	Count should be displayed Accurately
9	Verify the image gets uploaded	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "PIM" subtab 3. Select 'Add Employee' option >Click save button 4. Upload an Image from the device 	Reference path \src\ pages\PIMPage methods addPIMImage() You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.	Verify the image gets uploaded succesfully
10	Verify Client Logo could not be uploaded above 1 mb	<ol style="list-style-type: none"> 1. Login using validCredential 2. Click on "admin" in the sidebar 3. Click on the "Corporate branding" tab 4. Click the Client Logo Browse button 5. Select the desired file from device and click open button. <p>Note :- If you cannot find the locator for "Proceed" button, please try to keep the page at 75%-80%.</p>	Reference path \src\pages\AdminPage Methods companyLogo() You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.	Incorrect Dimension Error should Display

11	Verify Holiday Search Functionality	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "Configure" subtab 3. Select 'Holidays' option 4. Click on Fill from and to Date 5. Click on Search Button <p>Note :- If you cannot find the locator for “Proceed” button, please try to keep the page at 75%-80%.</p>	<p>Reference path</p> <p>\src\pages\LeavePage</p> <p>Methods :</p> <p>holiday()</p> <p>You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.</p>	Verify the holiday between the selected date is Displayed
12	Verify the Recruitment link is working fine	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "Recruitment" subtab 3. Select 'Vacancies' option 4. Click on web page url <p>Note: - If you cannot find the locator for “Proceed” button, please try to keep the page at 75%-80%.</p>	<p>Reference path</p> <p>\src\pages\Recruitment</p> <p>Methods:</p> <p>recritmentLink()</p> <p>You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.</p>	Verify a new url is opened on clicking the url
13	Verify Language change Functionality	<ol style="list-style-type: none"> 1. Login using valid credentials 2. Click on "admin" in the sidebar 3. Click on the "Configuration" tab 4. Click the Localization button 5. Select the desired Language from the dropdown (Chinese) 6. Click on Save button <p>Note: - If you cannot find the locator for “Proceed” button, please try to keep the page at 75%-80%.</p>	<p>Reference path</p> <p>\src\pages\AdminPage</p> <p>Methods:</p> <p>changeLanguage()</p> <p>You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.</p>	Successfully Updated alert should be displayed

14	Verify Candidate could be Deleted Successfully	1. Login using valid credentials 2. Click on "Recruitment" subtab 3. Select 'Candidates' option 4. Click on Delete option (Bin Icon) Note: - If you cannot find the locator for "Proceed" button, please try to keep the page at 75%-80%.	Reference path \src\pages\Recruitment Methods: deleteCandidate() You can use highlight Element method present in Common Methods file to highlight the element before performing any action on it. It takes locator as a parameter.	Verify the candidate gets removed from the list
15	Verify Required Field Error in Leaves Tab displays when required field is empty	1. Login using valid credentials 2. Click on "leave" in the sidebar 3. Click on the "assign Leave" button 4. Click on "Assign" button without filing any details in any field Note: - If you cannot find the locator for "Proceed" button, please try to keep the page at 75%-80%.	Reference path \src\pages\LeavePage Methods: - verifyLeaveField() You can use highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes locator as a parameter.	Verify the candidate details gets Downloaded from the list

Learners will gain experience in building strongly typed applications using React.js and managing data flow with **TypeScript**. They'll learn how to define interfaces, use types for error prevention, and improve code maintainability. URL <https://opensource-demo.orangehrmlive.com>

App. Key skills include:

- **Browser Automation:** Interacting with web elements and testing multiple browsers.
- **Assertions & Validations:** Ensuring app behaviour meets expected results.
- **End-to-End Testing:** Automating real user interactions and validating overall app functionality.

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

Execution Steps:

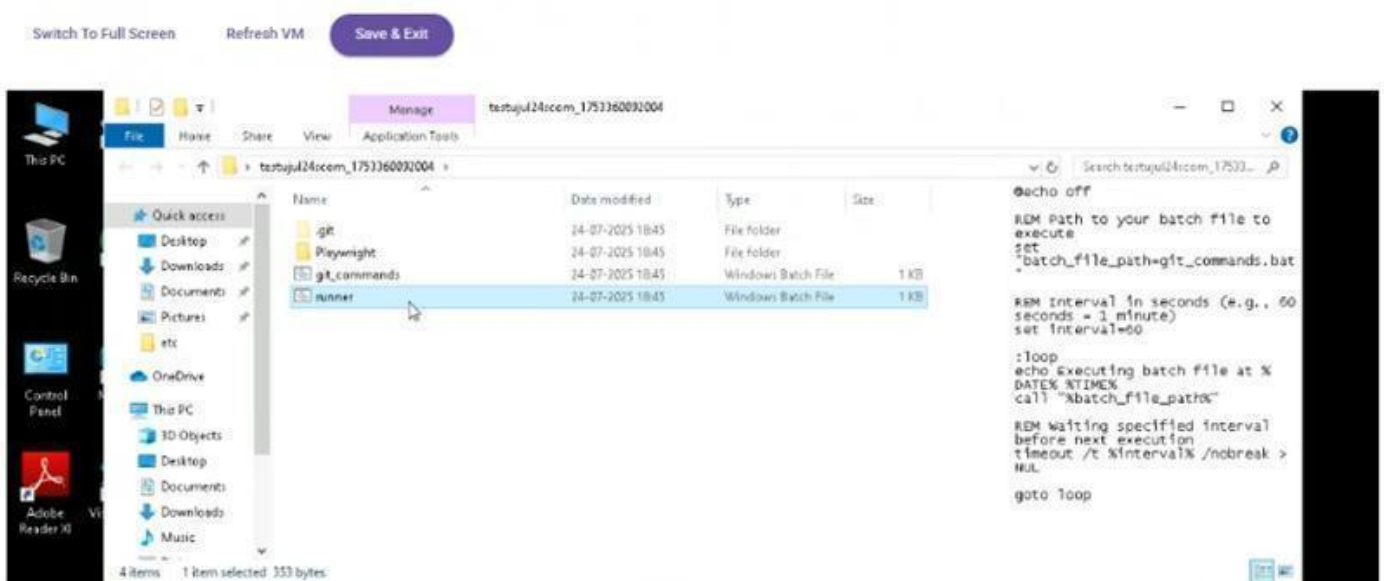

Steps for Execution:

1. Please open the folder created on desktop with the email name you used to login.

HRMS automation using playwright

1. Go into the Playwright folder and execute this “runner” file. This will keep pushing the code at regular intervals

Mymedic automation using playwright

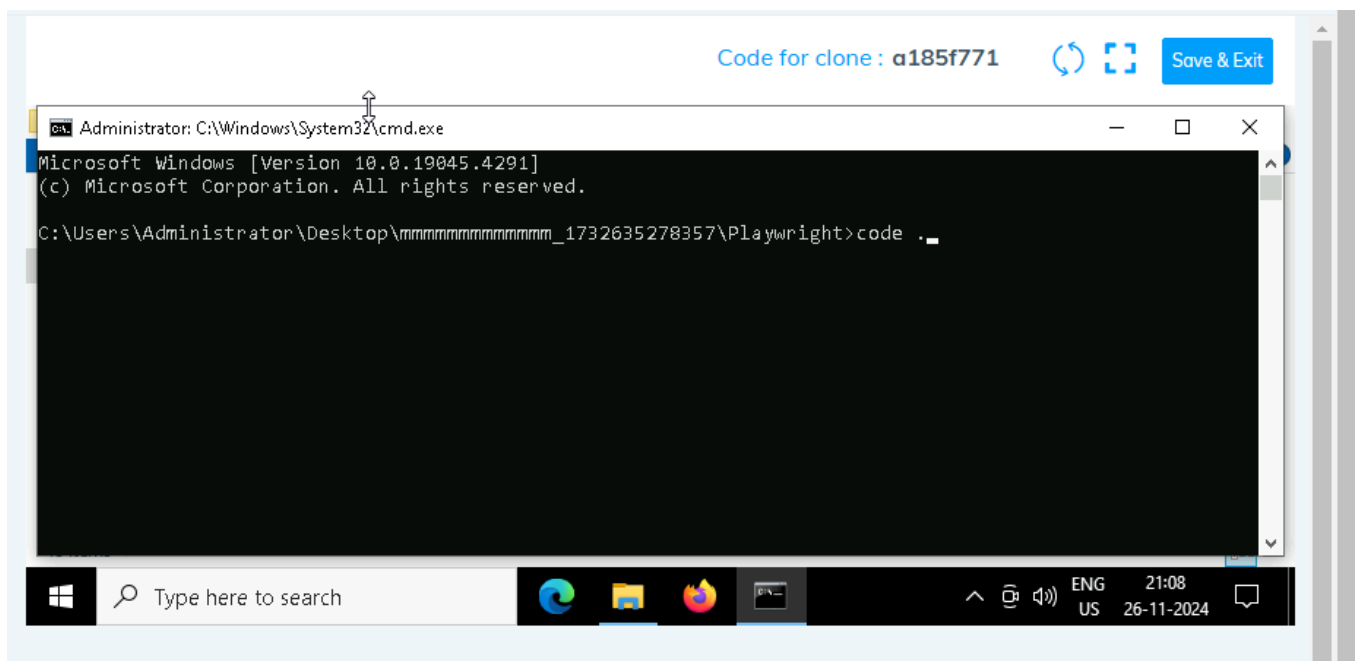

Mymedic automation using playwright

2. Open command prompt with its location and use below command:

code .

HRMS automation using playwright

3. Once VsCode is open. Please open the terminal in Playwright folder:

HRMS automation using playwright

4. Install all dependencies in the Playwright folder path using:

```
npm install
```

5. Install playwright in the Playwright folder path:

```
npx playwright install
```

6. Run the Tests in the Playwright folder path:

```
npx playwright test ./src/tests/PL2_testcases/yaksha.spec.ts
```
